

# Here, your development expertise will get more of a reaction.

## GUI Software Lead Developer up to £60k + bonus + stock options • Cambridge

We are a cutting-edge enterprise, so the most innovative tools are essential. That's why, for us, pushing the boundaries with software that models the most complex phenomena is an ongoing project. We constantly face new technical challenges, helping companies all over the world maximise their research efficiencies, lower their costs and accelerate the R&D cycle.

And behind the success story that has seen us expand globally, has been a team of computer scientists of the highest calibre. We have become rightly renowned as pioneers in our field and the Materials Studio in Cambridge is no exception.

Right now we're looking for a talented developer to join them, working on highly advanced scientific applications.

Having graduated with a good Computer Science, Mathematics or Science degree, you will now be experienced with Win32-based C++. Developing the software behind the user interface will draw on an extensive knowledge of Windows UI, as well as a highly developed object design skills. You will also play a part in making sure that the whole team learns from your expertise. A team-oriented approach and good communication skills will therefore be essential, as will a dedicated work ethic.

Because you'll be investing your skills in our future, we'll make sure that you get a piece of it. On top of a competitive salary, stock options will be part of the package.

To share in the success, please send your full CV to Ian Bennet, quoting ref: IB2623 at Kramer Westfield Search & Selection, The Old Pound House, London Road, Sunningdale, Berkshire SL5 0DJ. Tel: 01344 875087
